

BRIDGING CITY AND PORT

NEW FORMS OF LIVING, WORKPLACE AND GREEN SPACES FOR VENICE

University IUAV of Venezia - Department of Design and Planning in Complex Environments, Master Degree Architecture and Innovation. - Architectural and Urban Design Workshop IL1A- 2017-18

Ideas and projects for the sustainable urban regeneration of the area along the "Scomenzera" canal

The presentation of the Design Workshop "**BRIDGING CITY AND PORT**" will be held on Tuesday, June 26 at 6.00 pm at the Ex Church of S. Marta, inside the study area. The design research led to 17 different proposals highlighting the potential for a sustainable urban regeneration of the area along the Scomenzera canal. Connecting city and port is an opportunity to define new forms of living, working spaces and greenery, with the ultimate aim to help reverse the tourist monoculture by starting to bring houses for those who want to live in Venice, spaces to work, study and play sports. The theme "bridge" was used in the Design Workshop both as a physical connotation, a real link, and to conduct a reflection on connecting and creating new relationships as a strategy for the design of an important part of the city. The goal of creating a *bridge* between city and port is combined with the idea of the *bridge* between activities and different economies such as art, culture, handicraft, energy and environment tech, between artificial and natural, between land and water, between the historical and contemporary city, between past and future.

The project offer a variety of solutions for living in an innovative way by providing spaces for producing art and handicraft, spaces for education and training, green spaces and leisure, entertainment and sport, commercial services and markets, cinemas and theatres. The area has also been interpreted as an innovative exchange between land and water as well as being the entrance to Venice with a connection to electric vehicles, bicycles and private boats.

Welcoming addresses **Reiner Nagel** Chair of German Federal Foundation of Baukultur, **Piercarlo Romagnoni**, Director of the DPPAC, Università IUAV di Venezia, **Giovanni Andrea Martini**, President of the Municipality of Venice, Murano and Burano
Introduction **Sergio Pascolo**, Università IUAV di Venezia

The meeting takes place within the framework of the **International Baukultur Days Venice** and is part of the "**Building bridges - Brücken bauen**" Symposium organised by Bundesstiftung Baukultur in cooperation with the German Center for Venetian Studies.

All participants are invited to the "Building bridges - Brücken bauen" Symposium the following day, 27 June from 9.30 am at the German Center for Venetian Studies, Palazzo Barbarigo della Terrazza, S.Polo 2765 / A 30125 Venezia. Participation is free upon registration and confirmation:
