Born in Udine, he studied in Venice at the IUAV University Institute of Architecture, where he met such great masters as Manfredo Tafuri, Gino Valle, Vittorio Gregotti. He graduated in 1984 with a Thesis on Architectural and Urban Design on the IBA areas of Berlin, supervisor Vittorio Gregotti (110 cum laude).

After graduating he worked with Gregotti Associati in Milan (1985-1993) designing as project leader, among many others, the Centro Cultural de Belém project in Lisbon. He has lived and worked in Portugal (Lisbon, 1989-1991) and in Germany (Hamburg, 1993-

1997), maintaining close cultural and professional relationships with both cities and countries.

Sergio has been working for over 20 years on mixed-use, social, inclusive, and multigenerational housing and urban regeneration projects in Germany.

The works of SERGIO PASCOLO ARCHITECTS have been published in multiple architectural magazines and books. They have also been awarded the "Architekturpreis Zukunft Wohnen - Future Living Award 2009" in the "Living in City" section, and the "German Design Award 2017 Special".

He teaches Architectural and Urban Design as Adjunct Professor (Turin Polytechnic 2003-2005, and IUAV University of Venice since 2004) and regularly participates in international seminars, workshops, and conferences throughout Italy and Europe, and more recently in Asia and South America. These collaborations have provided a platform for him to facilitate discussions on sustainable Architecture and Urban Development through sharing the results of his own extensive experience, research and projects.

SERGIO PASCOLO ARCHITECTS

SERGIO PASCOLO ARCHITECTS is an international architectural and urban design studio focused on creating highly comfortable buildings and urban spaces with a positive impact on the quality of life for the users, inhabitants and citizens, while minimizing unnecessary resource use and costs. The team of architects and urban planners provide visions and ideas, as well as detailed preliminary plans for masterplans, buildings and interiors that respond to complex requests, at any scale. The goal is to transform and improve the physical spaces to achieve a better quality of life. The studio has designed and actualized many residential buildings, cultural and sport facilities, public spaces, renewal plans for historical areas and master plans for mixed use neighborhoods; it has participated in many national and international competitions and it is active in the field of refurbishment and interior design. The studio's projects have been displayed in exhibitions in Germany and China and published in Italian and

international magazines. of urban design and architecture have been widely published in magazines and books and awarded several prizes.

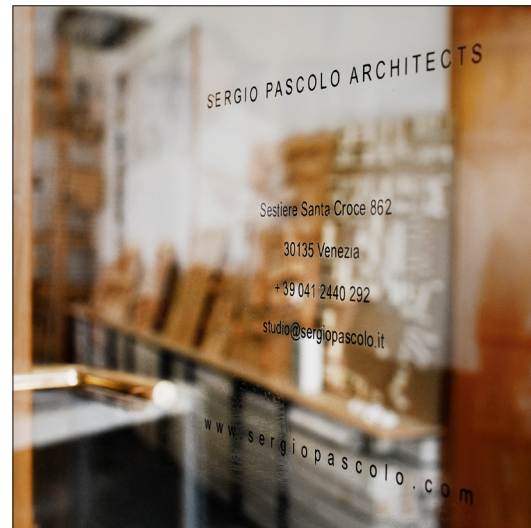

STUDIO

The practice, in addition to its original location in Udine, has been based in Milan and Hamburg. Since 2006 he has been based in Venice, in the former studio of Carlo Scarpa.

The office is located on the ground floor in Rio Marin in the very center of the city, close to the Basilica of Santa Maria Gloriosa dei Frari, one of the largest and most beautiful churches in Venice.

Our work tables are facing the water of the channel on one side and the green of the garden in the courtyard. The glass entrance door keep us ever in contact with the urban life outside, giving us continually the impulse to think with a human approach to our urban and architectural design proposal.
